Summary

Energetic and hands-on Software Developer proficient with both Front and Back End technologies who has successfully thrived in different industries due to my results-oriented work ethic. Proficient working in Agile environments using different approaches such as trunk based and feature based development. Skilled in developing features using the M.E.R.N. stack coupled with AWS. Naturally driven, I am an effective learner who is constantly seeking out new ways to grow as an Engineer.

Skills

Web Tools: HTML5, Sass, CSS3, JavaScript, Typescript, React, Redux, Ionic, GraphQL, REST, and WebSocket.
Databases: MySQL, MongoDB, Firebase, and DynamoDB.
Testing Tools: Cypress, Jazmine, and Jest.
AWS: Amplify, Cognito, Lambda Functions, and AppSync.
Version Control/Source Code: Git coupled with Bitbucket, Gitlab, AWS CodeCommit, and GitHub.
Server Side/Backend : NodeJS, Express, AWS CodeCommit, AWS API Gateway, AWS Lambda, AWS Cognito, and AWS AppSync.

Experience

Cyber Dive   **Mesa-AZ**
Software Engineer   **Aug 2020 – Present**

Translate marketing and business requirements into Front End interfaces using React and Ionic. Manage application state using Redux and Zustand. Perform GraphQL operations using AWS AppSync and Apollo. Responsible to increase accessibility and overall frontend performance by implementing semantic HTML and reusable React components. Write tests following test driven development (T.D.D.) processes to maintain the highest code quality and coverage with tools such as Cypress and Jest. Build and maintain event driven backend microservices using NodeJS and NATS Streaming. Collaborate in a DevOps oriented team to develop and maintain code base and implement new features. Proactively assist in process ideation, implementations, and evolution in a startup environment.

Little Taller   **Phoenix -AZ**
Freelance Front-End Developer   **Feb 2020 – Jul 2020**

Successfully converted project design into a modular, scalable, and responsive application using HTML, CSS, Sass, and React.js. Developed a single page portal where users can view and export reports into CSV files. Connected client and backend by consuming API endpoints to handle different users' requests. Converted data into native JavaScript to display information to the end-user. Debugged and troubleshot errors using Postman and Chrome DevTools. Worked directly with the product team, graphic designers, and the client.

Humana Health Insurance   **Tempe, AZ**
Customer Service Representative   **Oct 2018 - Oct 2019**

Educated members with benefits questions, company policies, and other important criteria for their decision-making process. Assisted medical staff, members, and coworkers to navigate company technologies ensuring they were taking the most advantage out of it. Joined the engagement team to help to foster a positive work atmosphere. Received a STAR award (employee recognition bonus) in my 5th month of employment for outstanding customer service.

Education

Certificate in Full Stack Web Development
University of Arizona – Chandler, AZ
A 12-week intensive program focused on gaining technical programming skills in several Front and Back End technologies.
OCT 2019 - JAN 2020

Ba in Social Sciences
Maringa State University – Maringa, Brazil
JAN 2008 - JAN 2012
